OBJECTIVE

Fullstack software developer seeking to contribute technical skills, adaptability, and a strong drive for professional growth in collaborative development environments.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, SQL

Frameworks & Libraries: Spring Boot, Angular, React, NestJS, FastAPI, Next.js

Databases: MongoDB, MySQL

Tools & Practices: Git, GitHub, Linux, Docker, Figma, REST APIs, CI/CD, Agile/Scrum

Styling: TailwindCSS, Sass

EXPERIENCE

- Fullstack Web Developer Intern** | Aegro Informática — Brazil 2025 — Present
- Completed the Aegro Dev Academy bootcamp (167 hours) focused on fullstack development with Spring Boot and Angular.
 - Refactored and developed new features for an internal quotation generator using NestJS and React.
 - Led the Public API initiative, enabling third-party integrations across the platform.
 - Designed, refactored, and reviewed cross-cutting frontend and backend decisions, including exception handling, data and architectural migrations, and production hotfixes.
 - Built multiple reusable UI components and screens, improving frontend consistency and reducing development time across the team.
 - Developed end-to-end features spanning both frontend and backend, from UI implementation to API design and database integration.
 - Worked within a modular monolith structured around hexagonal (ports and adapters) architecture.
- Team Leader & Fullstack Developer** | 10th Software Engineering Hackathon — PUCRS — Brazil 2025
- Led team communication, organization, and coordination with event staff for a social media platform focused on peer feedback and reward tracking.
 - Created the project concept and UI/UX design using Figma; selected the tech stack (Next.js, MySQL, React).
 - Contributed to both frontend and backend development, with primary focus on frontend.
- Frontend Developer** | Hackathon — PUCRS — Brazil 2024
- Developed a charity project hub enabling users to create and manage volunteer projects.
 - Designed the UI and built the frontend using React and TailwindCSS.
- Volunteer — School Store** | Burnaby North Secondary School — Canada 2023
- Supported sales, customer service, inventory management, and e-commerce operations during exchange program.

EDUCATION

- Bachelor's in Software Engineering** Expected Dec 2027
Pontifícia Universidade Católica do Rio Grande do Sul (PUCRS)
- Exchange Program** 2023
Burnaby North Secondary School — Canada

LANGUAGES

Portuguese (Native) • English (Fluent) • Spanish (Intermediate)

ADDITIONAL QUALIFICATIONS

- Strong teamwork, communication skills, and goal-oriented mindset.
- International experience through a study exchange program in Canada (2023).
- Competitive background in eSports (Valorant), demonstrating discipline, strategic thinking, and teamwork.

COURSES & CERTIFICATIONS

- Aegro Dev Academy — 167 hours (Udemy & Codecademy)
- Java Basics — Alura
- Git and GitHub — Alura
- Programming Logic with JavaScript — Alura
